

Meet Cincinnati VAMC's Residents!

Tyler Dickerson

Tyler.Dickerson@va.gov

Hometown: London, OH

Education: University of Cincinnati - James L. Winkle College of Pharmacy

Why Cincinnati VA? I had two rotations at the Cincinnati VA as a student and was very impressed with the preceptors' enthusiasm for teaching and the variety of inpatient and outpatient learning experiences. I especially liked the opportunity to work closely with several medical teams throughout the year.

Research Project: Comparison of safety following initiation of neuropathic pharmacologic therapies

Areas of Interest: Internal Medicine, Oncology, Teaching

Kate Hoffman

Kathryn.Hoffman@va.gov

Hometown: Fairfield, OH

Education: The Ohio State University

Why Cincinnati VA? Serving this patient population is very rewarding and there are several different pharmacy practice settings to experience at the Cincinnati VA

Research Project: Impact of Clinical Pharmacy Specialists on PACT Team on Improving Glycemic Control Among the Most Difficult to Manage Patients

Areas of Interest: Primary Care, Cardiology, Mental Health, and Geriatrics

Julianne Mazzola

Julianne.Mazzola@va.gov

Hometown: Cleveland, Ohio

Education: The Ohio State University

Why Cincinnati VA? Serving the Veteran population is incredibly rewarding. Cincinnati VAMC provides a wide range of experiences in primary care and inpatient which is perfect for a resident with many interests.

Research Project: Will setting up an order set/guideline decrease our overall use of fluoroquinolones?

Areas of Interest: Primary Care, Infectious Disease, Mental Health/Substance Abuse, Cardiology

Kristine Voon

Kristine.voon@va.gov

Hometown: Columbus, Ohio

Education: The Ohio State University College of Pharmacy

Why Cincinnati VA? The Cincinnati VA offers many learning experiences in both the inpatient and outpatient settings, with preceptors who really invest in their residents to help facilitate their growth into well-rounded clinicians. I have also seen how much responsibility and respect pharmacists are given within the VA system, and I couldn't be happier working with the rest of the healthcare team to serve those who have served us.

Research Project: Incidence of hyperglycemia with patients on TPN

Areas of Interest: Primary Care, Critical Care, and Oncology
